

04.05.20

Salam Alaikum,

This is the month of Ramadan for all our Syrian families. Although there are difficulties meeting for prayer during this time, we all hope that the month goes well for them.

ALERT LEVEL 3 UPDATE

Home learning

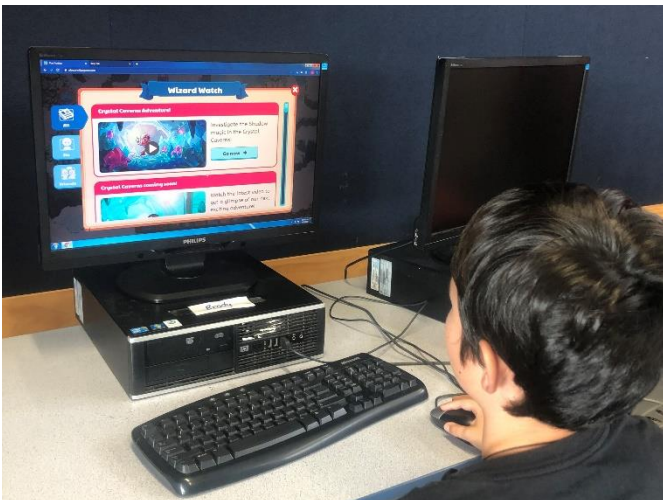

Our Home learning is working well. The teachers appreciate the hard work you put in to keep the home learning going while you have everything else to do. All the families I have spoken to and feedback through the students has been very positive. Thank you again for all your work.

Attending school

We were also excited to open the school for students whose parents or caregivers have had to go to work and have nobody to look after the children. Please contact the school office if you have to start work and have nobody at home to look after your children. The office will arrange for your children to be put into a bubble so everyone is safe. This arrangement has to happen the day before your children start. Your children can not just turn up to school without making these arrangements. We have to make sure they are safe, we are safe and other students are safe. We all sanitise and wash our hands frequently. We have a person who is dedicated to disinfecting all high touch surfaces and common spaces such as toilet areas.

If a child is sick or unwell, the school will contact the family to pick the child up immediately. Please take your child to the doctor and let the school know the outcome of the doctor's visit.

The students who are here are enjoying being back at school with the others. All the students here are also doing their home learning at school.

Visitors

All people who come to school have to sanitise hands, register with phone number at the office. You must always go to the office first to register. This is for tracing purposes.

Questions

Please contact the office for any questions about our health and safety management for children, staff and visitors.

Most of our general messages are through Facebook, text, and email.
